Industrial PC Platform
Openness meets Automation Control

Powerful performance – maximize output
Rock-solid build – improve uptime
Real-time OS inside – reliable machine control

Industrial PC

Powerful. Tough. Future proof.

Powerful, reliable, scalable - and tough as they come

Our NY Industrial PC has been designed from first principles to be powerful, reliable and scalable, making it ideally suited to visualization, data handling, measuring and controlling. We've simplified the design and build to eliminate faults caused by complexity and, with other unique design features, to maximize uptime and reduce costs. The future will be IT driven: Omron's IPC platform will make you part of it.

Simplicity improves reliability

Unnecessary complexity causes problems, so we've eliminated it totally, to improve reliability, maximize performance.

· No internal cables
· No complex heatpipes
· Structurally uniform mechanics to enable future expansion
· Reduced assembly, maintenance and labor costs
· Rock-solid architecture. Die-cast aluminum case

Active cooling and air-flow isolated from the electronics

Intel® Core™ i7 4 Core

Intel® Core™ i5 2 Core

Intel® Celeron®

Connections

Options: RS-232C or extra DVI-D for dual monitor

PCIe Card Slot Half-length (X1 or X4 depending on CPU)

SD Memory card slot (2.0 spec and up to 32 GB)

DVI

3x RJ45 Gigabit Ethernet ports

2x USB2.0, 2x USB3.0

Choice of storages devices: HDD or SSD (MLC and long-life SLC types) Second drive option

I/O connection prepared for UPS connection

Power supply: 24VDC non-isolated

Performance

· Based on fourth-generation Intel® Celeron® to Intel® Core™ i7 processors
· Up to 8 GB DDR3L RAM
· Intel® HD Graphics
· Unique heatsink effectiveness
· RoHS Directive (2002/95/EC), EU directives

### Industrial Panel PC: very stylish…

Our industrial-quality touchscreen panel PC's and monitors enable operator and maintenance engineer to interact more effectively with the machine. The touchscreen controller can detect non-standard actions such as false touches, palm rejection, water and cleaning - even if the user is wearing gloves.[1]

A few details…

· 12.1 & 15.4 Inch industrial display
· Multi-touch, using the latest projected capacitive technology
· False touch detection
· Glove operation[1]
· Easy built-in supportive mounting

[2]

*1. When using gloves, ensure to use gloves that are functional with this touchscreen.
*2. Industrial Monitor won the iF Design Award 2016. The iF Product design Award, presented by Hannover-based International Forum Design GmbH, is one of the world's most prestigious design awards.

Industrial PC
IPC Machine Controller

Perfect fusion: Sysmac machine control and IT technology

Designed specifically for machine usage, making them innovative yet reliable, the IPC Machine Controller combines the precision and utility of the Sysmac platform with the versatility and range of Windows programs. The two platforms operate simultaneously but separately, so if Windows is down, the machine just keeps on working. As a result, engineers become unstoppable - empowered to explore manufacturing innovation by leveraging big data, NUI (Natural User Interface) and IoT (Internet of Things) initiatives, all without compromising proven PLC reliability and robustness.

Industrial PC

- Fourth-generation Intel® Core™ i7; Four core/8 threads
- Windows Embedded Standard 7
- Open operating system enables use of own software
- Ethernet port for access to your IT systems

Machine Controller

- Sysmac Machine control inside
- 500 µs system cycle time
- 16 to 64 axes of motion control
- EtherNet/IP port for machine-to-machine, HMI communication
- EtherCAT port for up to 192 synchronized slaves
- Safety over EtherCAT - FSoE
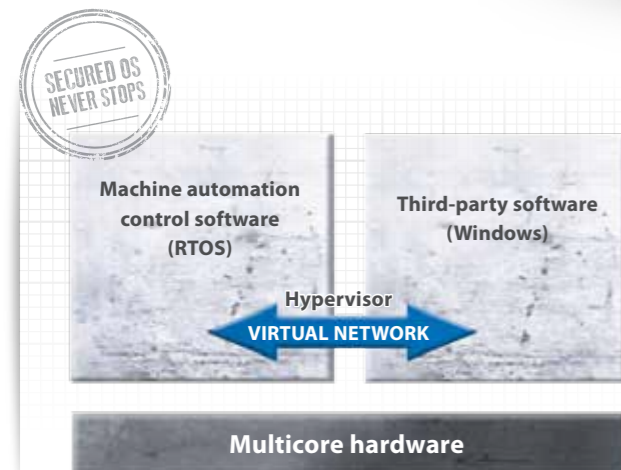

Sysmac Studio

Integrated Development Environment

- A single tool for logic sequence, motion, safety, robotics, vision, HMI and Database connection
- Open standard IEC 61131-3
- Sysmac Library to optimize engineering time and machine availability

The beating heart of the IPC Machine Controller

Our challenge was to use Sysmac machine control in combination with an open operating system like Windows. Normally it would be done using full virtualization, but this would influence the machine control, so it wasn't acceptable to us. Instead, we use partitioning, so that both operating systems can work independently: if Windows is down, the machine is not affected.

*Industrial Box PC was awarded the Red Dot Award 2016 in the category 'computers'. The Red Dot design award has been presented by the Design Zentrum Nordrhein Westfalen since 1955. It is one of the best-respected design competitions in the world, along with the iF award (Germany) and IDEA (the United States).
